

Locking opener

This opener can only be used to open bottom hung open in windows that require no pushing force to open them. Ideal where there is limited head clearance, the space required for installation is 20mm. Maximum opening 250mm, for windows under 500mm in height it is only possible to achieve an opening of 1/3 of the window height. In sets where more than one vent is required to open from one operator, junction boxes will be needed to transmit cable movement. Standard colour: White. Available, at extra cost, in silver, black or sprayed to any specific RAL colour.

EXAMPLES OF INSTALLATION WITH LOCKING OPENER

The dimensions are measured from the external limits of the vent and show the minimum necessary space.
Note: for safety reasons install side checks
