ESSMANN Spindle Opener

A removable manual crank is used to operate the spindle opener. The skylight dome can be opened to any length up to approx. 30 cm (other lifting lengths on request). Manual cranks are available in lengths of 1.50 m and 2.50 m.

ESSMANN Lifting Opener

A removable lifting rod is used to operate the lifting opener. The skylight dome can be opened to any length up to 30 cm (other lifting lengths on request). Lifting rods are available in lengths of 1.50 m and 2.50 m.

ESSMANN Servomotor Opener

The 230 V, 0.1A servomotor is fitted with splash protection (IP 54) and is multi-switch operated.

The skylight dome can be opened to any length up to 30 cm (other lifting lengths on request).

ESSMANN Egress Hatches

(see data sheet 2.13) Various types are available, depending on the nominal size, for manually-operated or gas-spring-driven opening from the inside. One special access hatch can only be opened from the outside.
